### **DETAILED ACTION**

Applicant's election without traverse of Group I in the reply filed on 11/1/04 is acknowledged.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 71-73 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 71 is directed to a method for preparing a compound of claim 57, comprising attaching a photoremovable group to C-3' or C-5' oxygen atom of a nucleoside and subsequently attaching an activated phosphorous group. There is not description in the specification of a method where the photoremovable protecting group is attached to the nucleoside before attaching an activated phosphorous group (see page 51).

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

Art Unit: 1637

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 57-70 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-37, 39 of U.S. Patent No. 5,753,788. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are both claiming compounds comprising a photoremovable protecting group covalently attached to a nucleoside at the 3' or 5'-position. Said nucleoside can comprise an activated phosphorous group. (see claims and col. 27-28).

Claims 57-65 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5, 7-13, 16-21 of U.S. Patent No. 5,889,165. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are claiming compounds comprising a photoremovable protecting group covalently attached to a nucleoside at the 3' or 5'-position. Said nucleoside can comprise an activated phosphorous group. (see claims and col. 27-28).

Claims 57-70 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,310,189. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are claiming compounds comprising a photoremovable protecting group covalently attached to a nucleoside at the 3' or 5'-position. Said nucleoside can comprise an activated phosphorous group.
